

Owner Dashboard Feature Guide

See the business clearly. Act from evidence. Stay connected to every store.

THE OWNER PROMISE

One trusted place to understand sales, stock, cash, customers, and every store.

The portal extends the synchronized POS record into a read-only management experience built for decisions—not data entry.

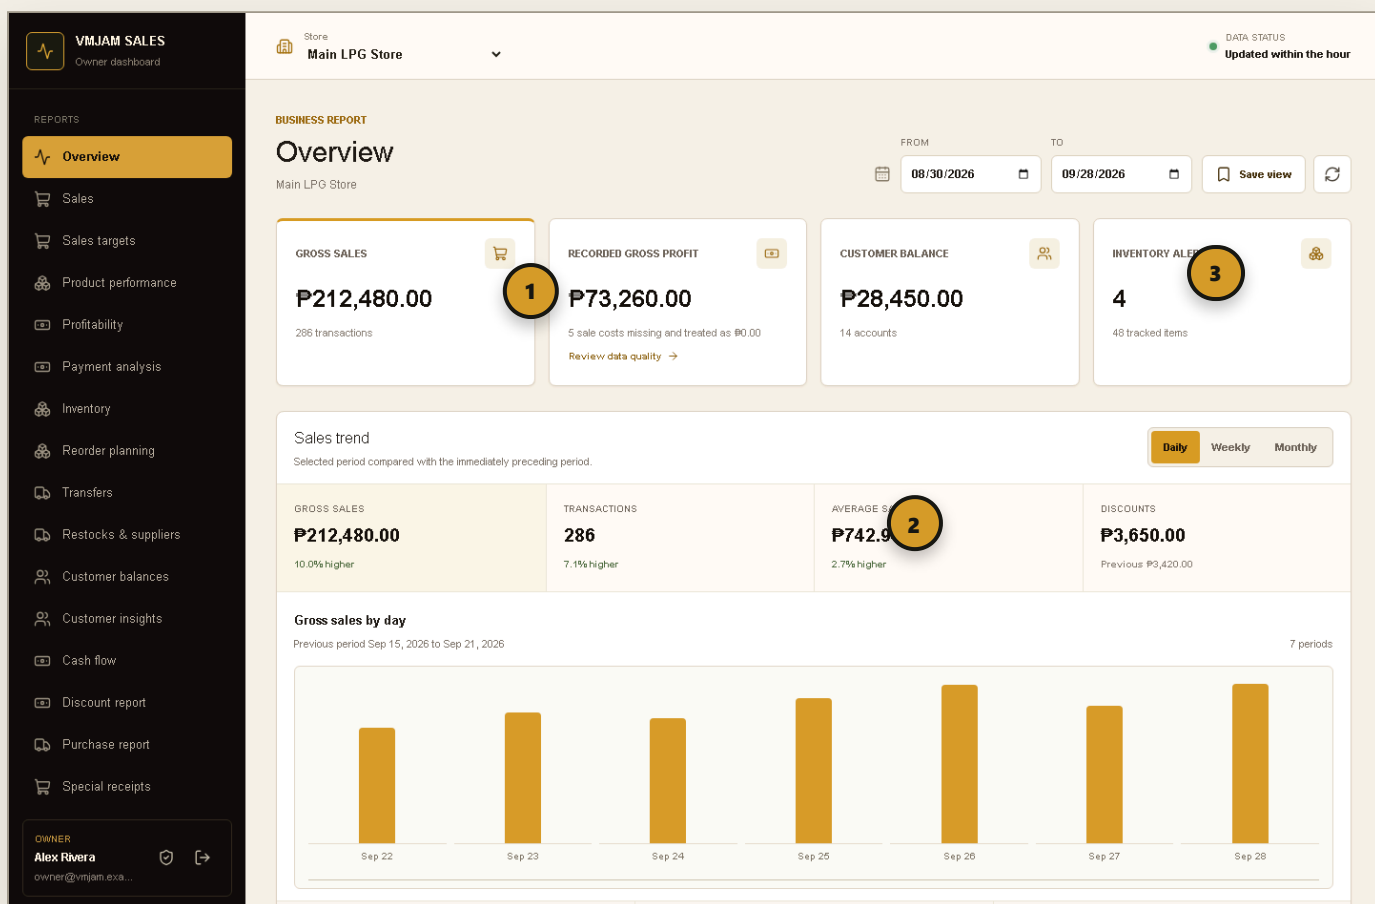

01 Executive control Overview · Sales Trends · Period comparison	02 Revenue performance Sales · Targets · Product performance · Profitability
03 Stock operations Inventory · Reorder planning · Transfers · Restocks	04 Customer and cash Balances · Aging · Customer insights · Cash flow
05 Multi-store reporting All stores · Alerts · Feature Mod reports · CSV export	06 Trust and governance Schedules · Preferences · Security · Data quality · Activity

How to read this guide

Numbered markers connect each real dashboard screenshot to the business value described below it. All figures shown are representative demo data.

Know the state of the business before the first question is asked.

The overview turns synchronized POS records into an owner-ready brief: sales, recorded profit, receivables, stock risk, and period movement in one scan.

- Owner KPIs surface the numbers that need attention now.
- Sales Trends compares the selected period with the previous period.
- Daily, weekly, and monthly grouping reveals momentum without changing the underlying dates.

Move from totals to the transaction that explains them.

Sales records give the owner a searchable, filterable ledger with read-only detail and export support—fast enough for daily review, precise enough for follow-up.

Showing 1–5 of 286

Snapshot Sep 28, 2026, 1:45:00 PM · Synchronized Sep 28, 2026, 1:47:00 PM · Schema 27

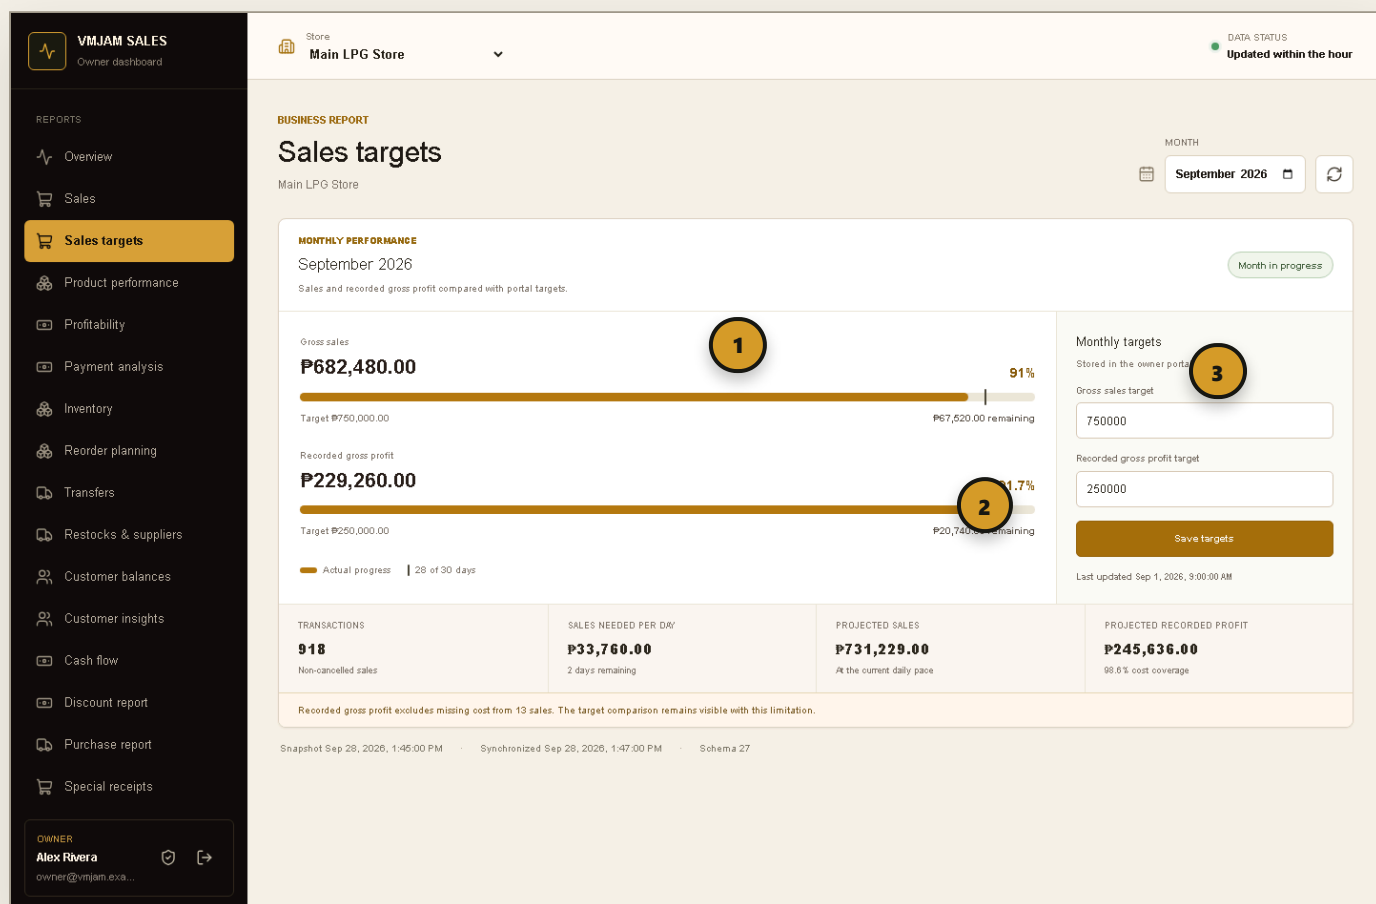

1 Search references and customers, then narrow by payment or status.

2 Open a sale to inspect items, costs, discounts, cashier, notes, and payment facts.

3 Export the exact filtered result set for external analysis.

Turn a monthly goal into a daily operating pace.

Sales Targets makes performance actionable. Owners see progress, the daily pace required, projected results, and profit coverage before the month is over.

- 1 Track sales and recorded gross-profit targets side by side.
- 2 See remaining value and required daily pace at a glance.
- 3 Cost-coverage context keeps profit claims honest.

See which products grow the business—and which only grow revenue.

Profitability ranks products and categories by profit, margin, or revenue while comparing the prior period and exposing incomplete cost coverage.
